PRESS RELEASE

MARKETING COLLABORATION BETWEEN WALKER GLASS Co. Ltd. AND PPG INDUSTRIES Inc.

Montreal, November 15, 2006 – PPG Industries Inc. and Walker Glass Co. Ltd., have entered into a marketing collaboration to increase the exposure of **Textures** acid-etched glass and mirror by Walker made with **Starphire®** Ultra-Clear glass by PPG.

The process of etching ultra-clear glass or mirror now provides architects and designers with a truly unique design option. The translucent satin appearance can be achieved without the "greening" effect of ordinary clear glass.

Marc Deschamps, Business Development Manager for Walker Glass Co., said **Textures** products made with **Starphire®** Ultra-Clear glass by PPG offer several distinct advantages such as high clarity, enhanced color purity, nearly unaltered neutral reflection and new levels of visual excitement with unique surface finishes on glass and mirror.

"Thanks to the ultra-clear character of **Starphire®** glass by PPG and the richness of Walker **Textures** products, the market is offered limitless creative applications", said Mary Ann Lydon, Marketing Manager, Specialty Glass PPG Industries, Inc..

Textures acid-etched glass and mirror by Walker and **Starphire®** Ultra-Clear glass by PPG are industry's leading products and can be used in a variety of architectural and specialty applications.
