

PROCESSES

- **Walker Textures™** acid-etched glass may be tempered in the same manner as unetched glass. However, when edging glass prior to tempering, it is important to follow the **Walker Textures™** fabrication guidelines.
- **Walker Textures™** acid-etched glass may be laminated in the same manner as unetched glass providing that the laminate is applied to the unetched surface.
- **Walker Textures™** acid-etched glass and mirror may be installed in the same manner as unetched glass or mirror, following normal industry installation standards and appropriate codes.
